GitHub: github.com/bos-code - LinkedIn: linkedin.com/in/chidera-okonkwo-38694433a

Objective

To secure a role as a Junior Front-End Developer while continuing to learn React, Python, and expand expertise in modern front-end frameworks and UI libraries.

Education

Secondary School Certificate
Florence High Flyers, Lagos, Nigeria

Technical Skills

Programming Languages: JavaScript (ES6+), PHP (WordPress)

Currently Learning: React, Python

Styling & Markup: HTML5, CSS, Sass, Tailwind CSS, DaisyUI

Front-End Frameworks & Libraries: Bootstrap, SwiperJS, PrimeReact, GSAP (GreenSock Animation Platform)

Build & Tooling: Vite.js, Parcel, Webpack, Git, Vercel

CMS & Platforms: WordPress (theme and plugin customization)

API Integration: RESTful APIs (TMDb)

Architecture & Patterns: MVC, OOP

Projects

Banquee - Front-End Developer

- Built a fully responsive landing page using vanilla JavaScript and SwiperJS with fade effects.

- Implemented generic Model and View classes supporting dynamic endpoints for trending and discovery.

- Applied MVC architecture to enhance code maintainability.

- Live: https://banquee-delta.vercel.app

Stream Vibe - Full-Stack Developer

- Developed a music discovery interface with TMDb API integration via a modular Model class.

- Created a reusable View class to render dynamic data in the DOM.

- Deployed on Vercel, troubleshooting build configurations for CI reliability.

To-Do List App - React Enthusiast

- Building a to-do list application in React as part of ongoing learning.

WordPress Customizations

- Developed and customized WordPress themes and plugins to enhance site functionality and user experience.

- Integrated DaisyUI to streamline styling and component design in WordPress projects.

Experience

Junior Front-End Developer - Self-Taught

Lagos, Nigeria | June 2024 - Present

- Developed web applications using JavaScript, HTML, CSS, and Bootstrap.

- Utilized Tailwind CSS and DaisyUI to build responsive, modern UI components.

- Integrated PrimeReact components for efficient React UI development.

- Applied GSAP for creating engaging animations and interactive effects.

- Configured and used Parcel and Webpack bundlers to optimize and manage project builds.

- Customized WordPress themes and plugins to meet client needs.

- Managed code versioning and collaboration via Git and GitHub.

Volunteer & Community

- Contributed to open-source projects and coding communities to expand network and skills.

- Mentored peers in front-end development best practices.
